

ExcluGrille® 3 and 4

CERTIFIED TO LPS 1175 ISSUE 7 LEVELS SR3 AND SR4

**High specification steel security grilles
designed and produced for commercial
and industrial applications.**

SECURITY

INDUSTRIAL

Applications

- Utility buildings
- Factories and warehouses
- Police stations
- Hospitals
- Banks
- Retail outlets

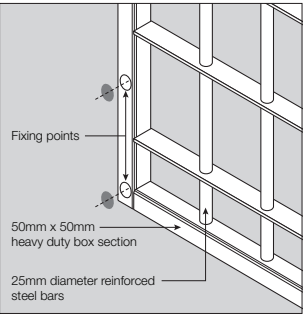

ExcluGrille® 3 and 4

General Features

- Reveal mounted security grille (SR3).
- Multi-point fixing system allows maximum flexibility to suit site requirements.
- Internally or externally face-fixed security bar set.
- Installed directly into brickwork, concrete or steel.

Construction

Constructed from 50mm x 50mm heavy duty box section and 25mm diameter reinforced steel bars.

Finish

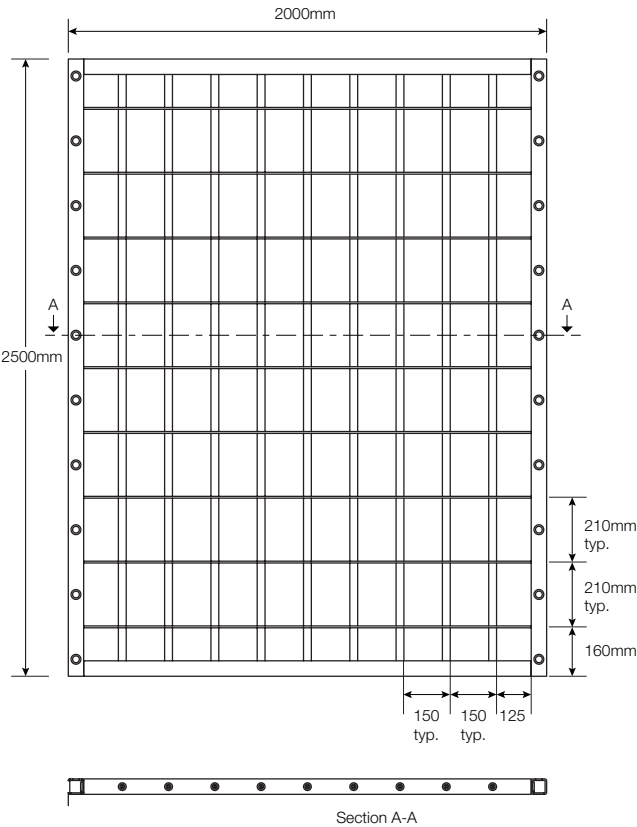

Supplied with Anti-Corrosive Environmental paint finish in a wide range of BS/RAL colours.

Fitting

Flexible design/manufacture to suit any size of opening and requires as little as eight fixing points (four per side) for ease of installation.

ExcluGrille® Dimensions

	HEIGHT		WIDTH	
	Minimum structural opening	Maximum structural opening	Minimum structural opening	Maximum structural opening
ExcluGrille® 3 and 4	500	2500	500	3000

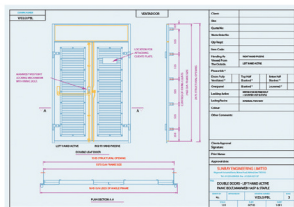

Minimum size grille set up ready for testing of fixing design concept, to determine suitability for reinforced concrete applications.

Bespoke design services

Complementing our standard door ranges we also offer a complete, bespoke design service to suit specific client needs or to overcome site/building constraints.

Sunray installation service

We offer an installation service covering our steel door, louvre systems and ExcluDoor® security door ranges.

Work is carried out by our own qualified factory-skilled operatives, not sub-contractors.

Procedures are audited and our installation process is approved and certified by CHAS, Safe Contractor, Achilles Builders Confidence and Achilles UVDB.

Sunray's Installation Service is certified by the LPCB/BRE to LPS 1271 for security doors.

External face-fixed application.

Nationwide delivery service

Specialist transport including arctics, curtain sidlers with Moffett facility, flat bed lorries with HIAB facility and lightweight vans including Crossrail compliant vehicles.
